

Evaluation in Fragile context : Case study of participatory approach in an AAR

EXPERIENCE FROM LAKE CHAD BASIN FRAGILE CONTEXT – CAMEROON

PIERRE STEPHANE NYENGUENA, MEAL SPECIALIST

Fragile context in the northern part of Cameroon

- Insecurity in the northern part of Cameroon, bordering Nigeria.
- 588,131 IDPs, including 377,877 IDPs, 49,564 refugees outside camps and 130,690 returnees.
- 83% of displacement is due to armed conflict.

Experience of participatory approach in AAR - Context

- ▶ Midterm Evaluation : After Action Review
- ▶ German Federal Foreign Office
- ▶ 2,452,511 USD
- ▶ Target 15.000 beneficiaries, Refugees, IDP, Returnee and Host
- ▶ Location : Cameroon – (Nigeria Boarder)
- ▶ Multi-Sector intervention: WASH, Shelter, LFS, Protection and Education
- ▶ 2019 Cameroon HRP

Experience of participatory approach in AAR - Methodology

- ▶ Internal evaluation
- ▶ Participatory approach
- ▶ Qualitative method
 - Key Informant Interview
 - Focus Group Discussion
 - Document review
- ▶ Non-probability sampling

Experience of participatory approach in AAR - Challenges

- ▶ Adapting an evaluation designed before COVID 19 to COVID 19 era
- ▶ Access limitation to implementation zones
- ▶ COVID 19 restriction
- ▶ Displacement movement
- ▶ Use of technologies in data collection
- ▶ Conducting a remote AAR

Experience of participatory approach in AAR – Lessons

- ▶ Flexible/Adaptative process for a participatory approach in evaluation in fragile context.
 - Data collection method : direct field data collection - remote data collection.
 - Sampling adjusted to access constraints, COVID 19 restrictions and beneficiaries participation.
 - Remote online AAR

Self-reliance in fragile context - AAR Keys lessons

- ▶ Multisector integrated approach is a key factor to strengthen self-reliance of affected population;
- ▶ Shifting integration from project perspective to a programme perspective, a driver of self-reliance;
- ▶ Connect the humanitarian responses with the development responses : Triple Nexus.

THANK YOU
